Secure Coding Workshop

Project funded by the National Security Agency

Workshop Facilitator Profile

Dr. Andrew Neel is an accomplished leader in the industry with 15+ years of experience in computer security. In addition to his full-time employment as a security professional, Dr. Neel serves as an adjunct faculty at the University of Memphis.

Workshop Description

Gain an understanding of common threats in today's software and learn how to appropriately avoid these threats. The workshop introduces key concepts through brief lectures and discussion and reinforces the concepts through practical demonstrations and labs

Lunch and parking will be provided. Registration will start at 12:30 PM*
