## **Purpose**

This training material highlights how to access the **um** wireless network.

## **Audience**

University of Memphis faculty, staff, or students that will be connecting to the on-campus **um** wireless network.

# um Wireless

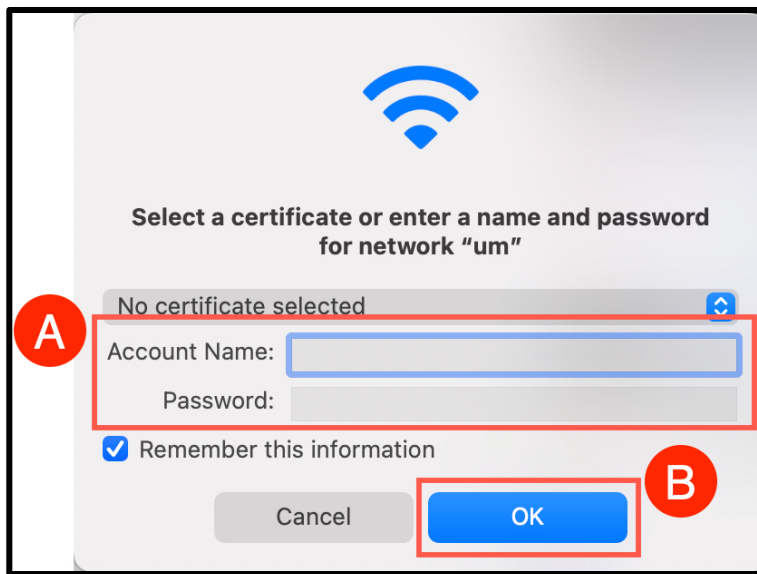

## Connecting on a Mac

---

1. **A)** Select **um** wireless from the wireless network. **B)** Click **Connect**.

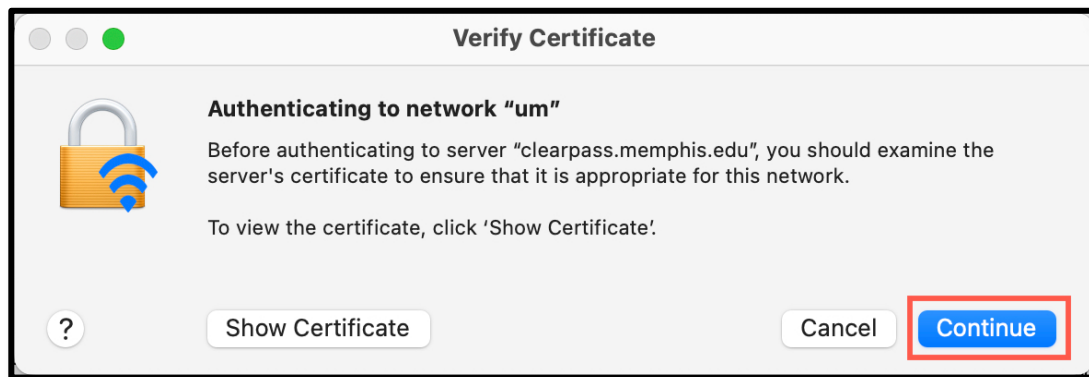

2. Check the **Remember this network box** and **A)** sign in with your Username UUID (first part of your email address) and password. **B)** Click **Join**.

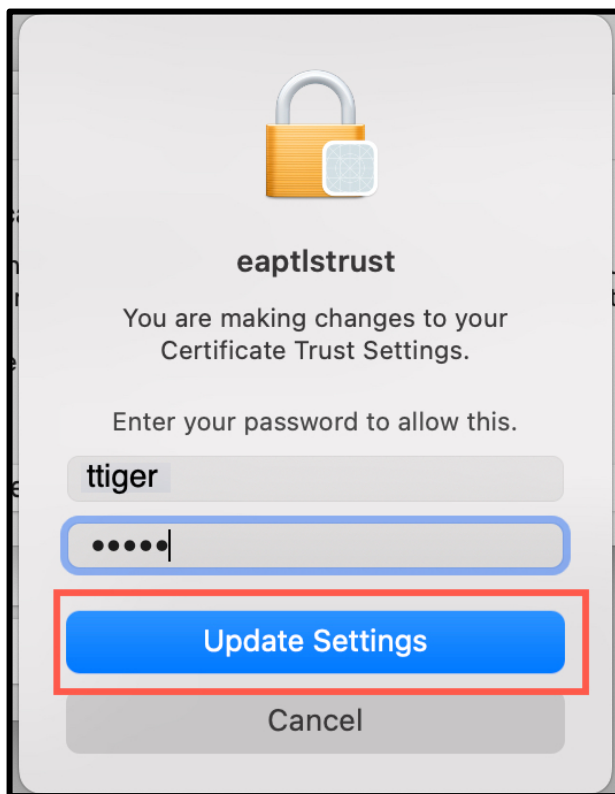

**Note:** This is NOT the administrative password for your computer. Your **Username** will be the first part of your UofM email address and associated password. Uuid does not include a preferred email address.

3. Click **Continue**.

4. Sign in with your computer's administrative password and click **Update Settings**.

5. You are now connected to the um wireless network.

## Trouble connecting?

If you have recently changed your password and are having trouble connecting, you may need to forget the network and re-associate your device with the campus network.

1. From the wireless network menu, select **Open Network Preferences** at the bottom of the dropdown menu.
2. Click **Advanced** near the bottom right corner.
3. Select the network you want to forget and click the **minus symbol** under the Preferred Networks section.
4. A window will pop up confirming that you want to forget the network; click **Remove**.
5. Click **OK** in the bottom right corner of the window.
6. Click **Apply** in the bottom right corner of the Network Preferences window.
7. You have removed the network. To re-associate, follow the steps above in **Connecting on a Mac**.

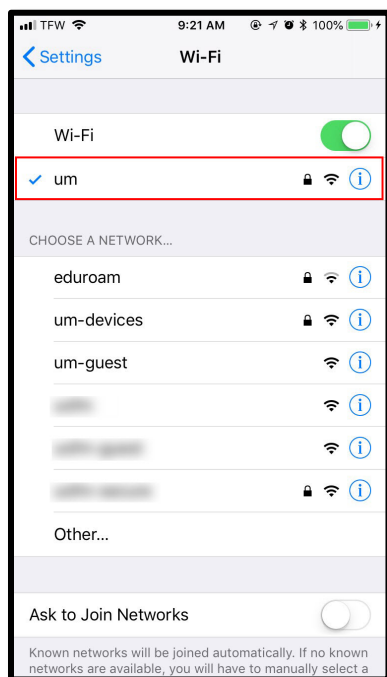

## Connecting on an iPad or iPhone

---

1. Go to your system **Settings**.

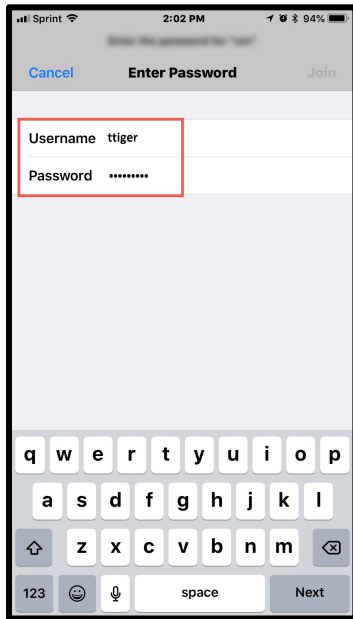

2. Select **Wi-Fi**, then choose **um** from the list of network choices.

3. Enter your **Username** (UofM uuid) and **Password**. Your **Username** (uuid) will be the first part of your UofM email address, and your **Password** is the same as your UofM email and myMemphis password. In this example, Tom Tiger's username is used (ttiger). Uuid does not include a preferred email address.

**Note:** This is NOT the administrative password for your mobile device.

4. A window will pop up asking you to trust the certificate. Click **Trust**.

5. You are now connected to the um wireless network.

## Connecting on a PC - Windows

---

1. From the **A) Network settings**, **B)** select **um** from the list of available wireless networks.

2. Click **Connect**.

3. You will be prompted to **A)** enter your username (first part of your email address) and password. In this example, Tom Tiger's username is used (ttiger).

**Note:** This is NOT the administrative password for your computer. Your **Username** will be the first part of your UofM email address and **associated password**. *uuid* does not include preferred email address.

4. **B)** Click **OK**.

5. Next, you will receive a Windows Security Alert - **Continue connecting?** Click **Connect**.

6. You are now connected to the um wireless network.

## Trouble connecting?

If you have recently changed your password and need help connecting, you may need to forget the network and re-associate your device from the campus network.

1. Click on the Windows Start button and select **Settings**.
2. Select **Network & Internet**.
3. Under Wireless Network Connection, click **Manage Wi-Fi settings**.
4. Under Manage Known Networks, select the network you want to forget and click **Forget**.
5. You have removed the network. To re-associate, follow the steps above to Connect **on a PC – Windows**.

## Connecting on an Android or Tablet

---

1. Go to your device **Settings**.

2. Make sure that your **Wi-Fi** has been activated for the device.

3. Select **um** from the wireless networks.

4. From the **Server CA certificate** menu **Do Not Validate** or **Don't Validate** (Depending on the OS) from the drop-down menu.

A screenshot of the 'Join Wi-Fi network' dialog box on an Android device. The dialog has a title bar and several input fields. The 'SSID' field contains 'um'. The 'Security' dropdown is set to 'EAP'. The 'EAP method' dropdown is set to 'PEAP'. The 'EAP Phase 2 authentication' dropdown is set to 'Automatic'. The 'Server CA certificate' dropdown is open, showing 'Do Not Validate' selected (highlighted with a red box). Below this are fields for 'Subject match', 'Subject alternative name match', and 'Domain suffix match'. At the bottom, there is an 'Identity' field and two buttons: 'Cancel' and 'Connect'.

5. From the **Server CA Certificate** drop-down menu select **Do Not Validate**. Next click connect.

Server CA certificate  
Do not check

6. (A) Enter your UUID (first part of your email address) and password.  
**Note:** This is NOT the administrative password for your device. Your **Identity** (username) will be your uuid, the first part of your UofM email address, and the password associated with it. In this example, Tom Tiger's username is used (ttiger). Uuid does not include preferred email address.

7. (B) Make sure **Auto Reconnect** is selected, then click **Connect**.

A No certificate specified. Your connection won't be private.
